

Bettermarks[®] is a new, digital, adaptive mathematics program developed to give learners immediate feedback as well as tips as they work out problems. Teachers can assign worksheets and tests from over 100 000 CAPS-aligned questions from Grades 4–10, and can monitor individual learner's or class progress to easily identify learning needs. Accessible on any connected smart device. Bettermarks[®], makes math easy.

Supporting the CAPS Curriculum

- Grades 4–10
- Mapped to the curriculum
- All topics relate to CAPS

Learning from mistakes through real time feedback

It's all in the how

Different problems require different answering methods – not just multiple choice – allowing learners to apply their maths knowledge instead of just guessing the right answers. Learners can practice specific techniques so that they can replicate them on paper during exams.

More than just 'right' or 'wrong'

While learners practice the techniques specifically required for a certain question Bettermarks[®] assesses the learner's approach and can nudge them in the right direction as they work.

Support

Bettermarks[®] reacts to errors in thinking with targeted customised feedback.

Systematic identification of mistakes

Bettermarks[®] analyses all user input for typical calculation mistakes and errors in approaches to problems, and then provides more exercises to practice and master these skills.

Bettermarks® at school – here's how it works

Teach

Introduce the topic in the lesson as you usually would.

Assign

Give Bettermarks® exercises to your learners.

Work

The learners work through the exercises on a connected smart device.

Evaluate

Get the results with the click of a button.

Follow up

Repeat material or move on.

Teaching tool – homework, worksheet and test builder

Graded eBooks consisting of pre-developed questions by skill area are available for the teacher to:

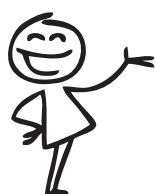

- assign to learners in sections for homework.
- build worksheets for individual learners or the whole class to practice any combination of skills.
- build time restricted tests or assignments which learners need to complete for formal or informal assessment.

Sign up for Bettermarks®

- Bettermarks® is purchased for a calendar year.
- Schools register for all respective learners, who will each receive a voucher code, as will their teachers.
- Learners and teachers can access the platform as soon as they have signed up.
- First time schools who buy between October and December will have free access for the remainder of the year and full access for the following year.
